Protecting your Child - Tools

- * technical tools
- * education tools
- * reporting tools

Parental controls

As a parent or carer it can be difficult to monitor what your child is up to online. Most parents and carers trust their children online, but it can be easy for a child to stumble across things that might upset or disturb them. Filtering and moderation packages are a good way to stop the majority of inappropriate and harmful content coming into your home. They are a tool to help you set and change online boundaries in line with your child's development. There are some great packages out there, some are free and some come at a cost. Make sure you get one that suits your family's needs and budget.

How can this help me?

BT

BT's Security package is called BT Family Protection. This lets you choose the right level of protection for each child on up to three computers in your home. With this service you can:

- **Block websites** – stop your kids from seeing inappropriate content
- **Set time limits** – manage how long your children spend online
- **Get instant alerts** – get email or text alerts when your kids try to view blocked sites or post information
- **Social networking tools** – control the use of social networks like Facebook and Twitter
- **YouTube filtering** – a unique technology to prevent exposure to unsuitable content
- **Usage reports** – review your children's online activity from anywhere in the world

As well as parental controls, you also get:

- **Advanced spam filtering** – with image blocking to protect children from offensive content
- **BT Cleanfeed** – blocks sites classified as illegal by the Internet Watch Foundation
- **Access to our internet abuse prevention team** – for children or parents to report any

A user guide for the BT Family Protection service is available and videos on the service are available.

Talk Talk

Talk Talk's Internet security service is called HomeSafe. Built into the broadband network itself, it blocks every device in your home from websites you've defined as unsuitable for your home. Part of the after school homework routine specifically. It's been developed in partnership with their panel of experts.

A guide to setting up HomeSafe is available as are videos for this service.

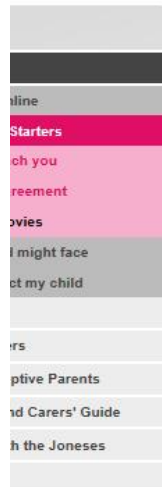

Virgin Media

Parental Controls is part of Virgin Media Security and is available for free to all Virgin Media broadband customers. With Virgin Media Security's Parental Control you can:

Protecting your Child - Tools

- * technical tools
- * **education tools**
- * reporting tools

Go to the movies

Your child may have watched one of our Thinkuknow cartoons or films at school; they are a great way to start your child about what can happen online and what they can do about it.

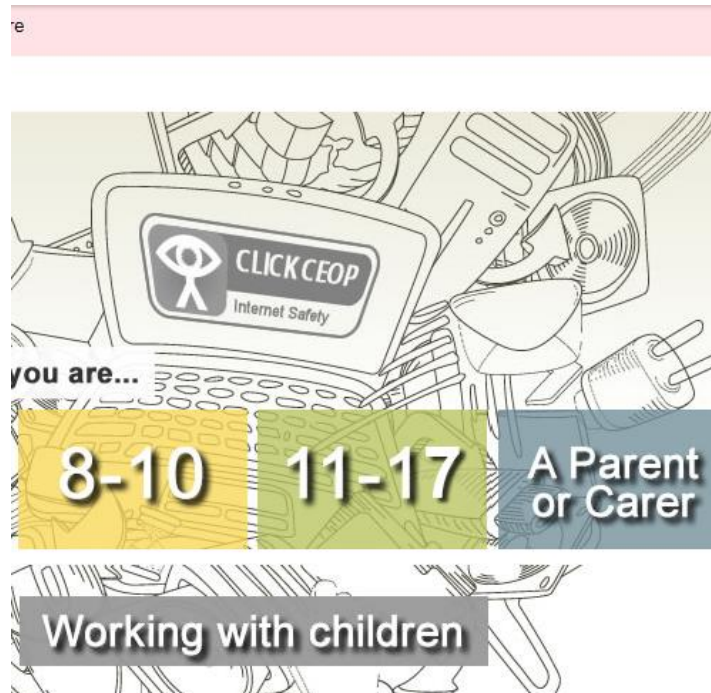

Ask your child if they have seen any of the films below and why not sit down and watch one together and discuss would recommend that you watch the film on your own beforehand so that you're aware of the topics it covers

Need immediate help?

Do you need immediate help or have a real emergency? If so call 999 or contact your local police here:

In England or Wales
In Northern Ireland
In Scotland

When should I report to CEOP?

We help children stay safe online. Has someone acted inappropriately towards you online, or to a child or young person you know? It may be sexual chat, being asked to do something that makes you feel uncomfortable or someone being insistent on meeting up. You can report it to us below.

Remember if you need immediate help call 999
