

Why is the School asking for donations when some face parents face financial uncertainty due to Covid19?

Even before Covid19 we were already operating in straightened times, with ever increasing budget cuts – in fact this is why the Charity Fund is so valuable. It is perhaps even more important going forward that we do have a fund which we can use to invest, and to help us unlock external investment.

It has always been the case, that our fundraising target of £1,500 per month will be reached thanks to some parents being able to afford to give much more than £10 a month and some able to give less. This is likely to remain the case. In light of Covid19 we remain even more grateful for every donation, however large or small and underline that all donations are entirely voluntary.
